

OUR ENVIRONMENTAL POLICY

We as "Tat Gıda Sanayi A.Ş";

- Act in conformity to all environmental laws and obligations while carrying out our activities and develop practices that go beyond them.
- Are aware of our impacts on climate change and energy, natural resource consumption, primarily water consumption, water emissions (waste water) and air emissions and aim to minimize these impacts.
- Adopt an environmental management that is based on continuous improvement.
- Support performance of the Environmental Management System with technological developments.
- Use natural resources, primarily water and energy efficiently
- Strive for reducing our greenhouse gas emissions and other air emissions.
- Prevent waste generation at source, reuse, recycle wastes and dispose them according to legislation if recycling is not possible.
- Discharge our waste water according to legal requirements.
- Act in consideration of our environmental impact while making decisions.
- Consider training of our employees, raising awareness of our stakeholders essential.
- Review our environmental policy regularly, monitor and audit our performance through goals and objectives.
- Share our environmental performance with our stakeholders by means of annual reports.
- Obtain support and contribution of all of our stakeholders from our suppliers to customers.
- Come together with the sustainability committee, environmental management units and our stakeholders at least once a year and review environmental policy and practices.
